Experiment 10. NumPy array functions

In [6]:
```
import numpy as np
array=np.random.randint(1,100,9)
array
np.sqrt(array)
print(array.ndim)
print("\n")
new_array=array.reshape(3,3)
print(new_array)
print("\n")
print(new_array.ndim)
print("\n")
print(new_array.ravel())
newm=new_array.reshape(3,3)
print(newm)
print("\n")
print(newm[2,1:3])
print("\n")
print(newm[1:2,1:3])
print("\n")
print(new_array[0:3,0:0])
print("\n")
print(new_array[0:2,0:1])
print("\n")
print(new_array[0:3,0:1])
print("\n")
print(new_array[1:3])
```

```
1

[[15 74 98]
 [75 90 72]
 [67 17 88]]

2

[15 74 98 75 90 72 67 17 88]
[[15 74 98]
 [75 90 72]
 [67 17 88]]

[17 88]

[[90 72]]

[]

[[15]
 [75]]

[[15]
 [75]
 [67]]

[[75 90 72]
 [67 17 88]]
```
